

No to fracking anywhere

No to fossil fuel investment

5000 Manchester residents have called on the local pension fund to divest from fossil fuels and an MEN poll shows a substantial majority of local residents oppose fracking. Yet BP, a major international fossil fuel company, have chosen Manchester for their first AGM outside London. Local residents and people affected by BP's world-wide operations will be calling on the investors at BPs AGM to stop accelerating climate-change by fracking in Argentina and will call-out the human rights abuses associated with continued extraction of fossil fuels in Latin America.
