

CLIMATE

EMERGENCY

IN RESPONSE TO THE *CLIMATE EMERGENCY*, WE ARE CALLING UPON THE GREATER MANCHESTER PENSION FUND TO...

- Make the fund fossil free within the next 2 years.
- Immediately move all investments out of the most polluting fossil fuels (coal, tar sands & fracking).
- Develop a strategy to invest in local climate solutions in Greater Manchester.

fossilfreegm.org.uk

The Greater Manchester Pension Fund (GMPF) is the largest and dirtiest in the country. By following in the footsteps of hundreds of investors, including Norway and New York City, the GMPF must divest to...

Do the right thing
for a safe and healthy future for members and their families.

Reduce financial risk
as the world moves away from fossil fuels.

Protect our reputation
Live up to Greater Manchester's zero-carbon ambition.

Accelerate the transition
Invest in the clean energy of the future, not the fossil fuel dinosaurs of the past.

Why divest

Moorland fires, toxic air, extreme weather... the GMPF is funding climate chaos.

Around £2,000,000,000 (£2 billion) is currently invested in polluting fossil fuel companies, such as Shell & BP.

These companies are risky investments for our planet and our pockets.

Local governments have a responsibility to work for the **public good.**

Join the campaign to help create a zero carbon Greater Manchester.

“ Greater Manchester is going to lead the way for others as we move towards a cleaner, greener future.”

- Andy Burnham (Mayor of Greater Manchester)
